THE BANQUET OF THE C.G.I.T.

The gaily decorated tables and the promptly served dinner was enjoyed by all those present. The following toasts were given, with Mary Campbell as toast mistress—

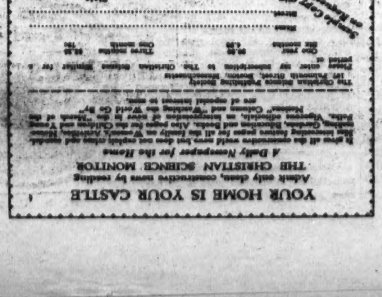
Toast, "The King," by Olive Davidson.
Reply by all singing "God Save the King."
Toast "Our Guests," by Erma Michael;
Reply by Mrs Gates.
Toast "The CGIT Movement" by Nora Kowensky.
Reply by Charlotte Smith.
Toast "Our Town," by Margaret Pailer;
Reply by Agnes Lauxman
Toast "To Our Leader," by Rachel Willie;
Reply by Miss Woods.

The banquet ended with [illegible] which were enjoyed by the 23 Girls present,' as well as Mrs Grtes, Miss Macdonal, Miss Eversmau, Miss Collicutt, and the leader Miss Woods.

"SUFFICIENT UNTO THE DAY."

There may be an exodus from all parts of the continent to the University of Oklahoma, if the proposal of Senator Thomas of that state is acted upon, and the University establishes a course "to teach people how to live without money in the event of another depression." The next best thing would be the establishment of a course in the Canadian universities to teach Canadians how to live without money in the present depression.—says J. S. Cowper in the Edmonton Bulletin.

Apples, Crabapples, Plums and Pears.
In Good Condition. Reasonably Priced.
At the L. Zilliox Warehouse,
First Street, Stony Plain.



Four German Pictures.

Time 2 and a-half hours, will be shown at Kelly's Hall on Saturday Evg. March 2, at 8 o'clock. Adults 20c: Children 10c. The pictures are "Day of National Work" 1933, 15 minutes; "Thanksgiving Day, 1933," 30 minutes; "Eastern See," 1 and 1-2 hours: Springtime in the Black Forest, 30 minutes.

All these pictures are of a high Educational Standard, and everyone will be glad to see their Fatherland in the pictures.

Snowballs and Novelties.

The snowball and novelty dance on Friday night proved to be the event of the season, with a just-right attendance, the dance patrons of town and district being much in evidence, with a sprinkling of visitors from the City. The Skii Club is to be congratulated on the success of their maiden effort in the dance line.

The CGIT to the Front.

The Stony Plain CGIT were the sponsors to a very fine illustrated lecture which was given at the Stony Plain United church on Monday Evg. The slides to the lecture comprised a showing of scenes in the Canal Zone at Panama and a run of good comics. The girls were cheered up by their friends turning out in goodly numbers to the show.

The Coming Sales.

The auction which M Zucht held last week for A Giese at Golden Spike was an exceptionally successful one, with regard to the intake, as a record sum was obtained on the stock and machinery sold.

Mr Zucht has some more of these big sales in sight, notably that for John Ducholke on Tuesday next, March 5; and One for Mr Edwin Hoffman Friday March 8. These two gents are retiring from the farming business in Alberta, consequently there will be no reserve placed on any article offered. Each sale will start 12 noon.

The Expert Radiotrician.

Mr Fermann, head expert for the Pacific Radio Engineers, has been giving Stony a runover for the past week, devoting particular attention to those radios which require the attention of a skilled mechanician. He specializes on Marconis, Philcos, Victors; and made a first-class job on the Marconi machine at the residence of Mr Barth, and also on the radio at the Comisarow home. A few Philcos were brought to his attention, and these also were brought up to A1 condition. He is one of the staff of radiotricians who intend making a steady run of the towns on the line from Jasper to Lloydminster. If his duties permit, Mr Fermann expects to leave town to-day, but will be back here, on his way from Jasper, about March 20. Radio owners who are having difficulty in getting a proper reception from their machines would do well to keep this date in mind

HARDWICK'S
THE HOUSE OF QUALITY.

Fine Rayon Silk Hose Just Opened Up.
A beautiful lustrous finished Hose; sizes 8 1-2 to 10; colors, Neutral Beige, Crash Tone, Spring Toupe and Brownwood. 29c. per pair.

English Terry Towels with fringe ends.
Size 22x42; good wearing Towels at a price about half their actual value. 19c. each.

All Cotton Tweeds, made in England.
36 in. wide, in neat black and white, and blue and white checks, and several good plaid patterns. Special, 3 yards for $1.

Size 52x52" Linen Breakfast Cloths.
Shown in the popular large plaid checks in colors of Orange, Gold, Green. Priced at 75c.

Men's White Hemstitched Lawn Handkerchiefs.
These are much better than the price would [illegible]
Just received from an Eastern mill; new patterns and colors; sizes 10, 10 1-2, 11. 19c. pair.

SO

What Are Actual Needs?

Listening to a discussion the other day on quotas and schedules adopted by governmental authorities as a guidance to those entrusted with the heavy and extremely difficult task of dealing with the cases of people who at this time are compelled to look to governments for the bare necessities of life, the question was forced upon our attention: What do we actually need? Of course a varied number of things we want, and our wants differ as greatly as our individualities differ, but when it comes down to a definite listing of the things we actually need not only to sustain life, but to make life really worth living, the number and variety of such needs is comparatively small.

People to-day list as needs scores of things which less than a generation ago were not even in existence, or so little known and in use as to be regarded as very great luxuries. For example, unemployed people living in our cities and, through no fault of their own compelled to accept municipal and government help, look upon the provision of electric light as an absolute necessity, and would consider it a great hardship if they were asked to resort to candles, or even the old kerosene lamp, as a means of illumination. Yet their parents got along very well with kerosene lamps and their grandparents and great-grandparents did not feel they suffered any great hardship because they had nothing but candlelight. And throughout the length and breadth of rural western Canada to-day hundreds of thousands of people get along very well with kerosene lamps. But in our cities people now list electric light as an absolute need.

Casting our memories back to boyhood days, thirty, forty, fifty years ago, we recall that our clothing and food requirements, our actual needs, were small and inexpensive compared with what we list as needs now. As a matter of fact, many of our so-called present day needs are not needs at all, and if our environment was shifted, we would not regard them as needs. Hundreds of people go camping every year, leave what we term "civilization" and go off into the wilds, and put up with conditions of living, and go without scores of things,—and enjoy doing so,—which at home they insist upon having as actual needs.

Life, and real living, does not consist in the abundance and variety of the material things we may possess. The pioneer lacked most of the things now listed as absolute necessities, yet they enjoyed good health, were happy, and found life well worth the living. They built homes, reared families of sturdy children, saw beauty in their surroundings, and developed character. Their needs were few and inexpensive. And they built nations.

These years of depression are developing two types of people. Out of one group men and women are emerging with stronger, finer characters. They are more self-reliant, with hampering superficialities burned away like so much dross, with the result that with the passing of the depression they will be the strong men and women who will take the leadership in this world, and who, out of the experiences of these years, will profit throughout the years to come. The other group consist of those who have been content to drift with the tide, to regard themselves as the sole victims of circumstance, ready to sit with folded hands and let others not merely provide them with actual needs, but who demand that these others shall further burden themselves in order that they may be supplied with things they want over and above their needs. With the passing of the depression, members of this second group will find themselves unequipped and incapable of making that provision for themselves which they will then be called upon to make.

It would be well, therefore, for all people to give serious consideration to what are needs and govern their demands upon their fellow citizens, as represented by the State, accordingly.

CROWN BRAND CORN SYRUP

AN ENERGY FOOD THAT HAS NOURISHED MORE CANADIAN CHILDREN THAN ANY OTHER CORN SYRUP

A product of The CANADA STARCH CO. Limited

A Speedy Camera

Photographing simultaneously moving machinery and a clock dial, a camera recently invented in Europe takes up to 2,500 pictures a second and detects errors.

ALL FOOD MADE HER ILL

Caused By Acidity—Corrected by Kruschen

"It is only fair to pass these facts on," writes a nurse. "I was suffering from over-acidity and flatulence to such an extent that I was completely ill. I couldn't take food. When I actually forced myself to take something, I would be wretchedly ill. I have now taken Kruschen for 12 months, and I have no doubt that it has righted my digestive system. I am now quite fit and able to work with vigor again."—Nurse E. S.

Indigestion is caused by a failure in the flow of the gastric or digestive juices. As a result, your food, instead of being assimilated by your system, simply collects and ferments inside you, producing harmful acid poisons. The immediate effect of the six mineral salts in Kruschen is to promote the healthy flow of the vital juices of the body. As you continue with the "little daily dose," it ensures the regular and complete elimination of all waste matter every day. And that means a complete end to indigestion.

Figures show that fewer errors are made in night baseball than when the pastime is played in the day.

SKIN RASHES

Give Place to Velvet Smooth Skins

In almost countless numbers, skin sufferers have had cause to be thankful for D.D.D., the prescription of a highly successful physician, Dr. D. D. Dennis. This liquid prescription, now made and endorsed by Campana's Italian Balm chemists, allays irritation almost at once, and quickly clears up such skin troubles as eczema, hives, acne, ringworm, dandruff, pimples and rashes. Ask your druggist for D.D.D. Prescription. Trial size, 35c. Guaranteed to give instant relief or money refunded.

Signs All Can Read

Pictorial signs—a telegraph post for the telegraph office, a trunk for the baggage office, and a big question-mark for inquiries—are in use at Parkeston Quay, Harwich. All the symbols selected are known the world over, and foreign visitors of all nationalities can "read" them.

The Finnish statistical office reports that in the 13 main towns and cities of the republic 19,271 married women are engaged in remunerative activity; this is 18.9 per cent. of all married women there.

Seek Oil Independence

Germany Hoping Domestic Requirements Will Soon Be Met

Amazing was the resistance offered by the Germans during the war largely because of her scientists, and now the German people are seeking through scientific means to make their country as economically independent as possible. They are increasing their efforts to find substitutes for imports. Not the least of these is petroleum, or the mineral oil from which it is produced. It is now asserted by German scientists that within a few years Germany will be independent of mineral oil imports. Petroleum is being produced synthetically from coal, and success is attending efforts to utilize brown coal—lignite—so extensively found in Germany. In the last year Germany has produced a third of the petroleum needed and she hopes that by 1936 her total domestic requirements will be met.

Strange Happening

Radio Music Is Heard From The Spout Of A Kettle

Steam comes out of the spout of Miss Ruth Lightbourn's kettle at Oakville, Ont., but the utensil is also capable of producing other things. During a heavy fog, fine orchestra music came from the water container as it sat on the stove. The program, which was audible eight feet away, lasted 20 minutes, then faded. During a lighter fog the performance was repeated, but the music was fainter.

There is no radio in the house and the stove is in no way connected with a ground or aerial system. Miss Lightbourn is at a loss to explain the strange occurrences.

GARDENING

Gordon L. Smith

Spring is once more approaching and with it the desire in the normal human being to see [illegible] growing. Soon all signs of winter will have disappeared and the earth gradually change from its drab coat of brown to something green and warm. But before this change, the would-be gardener commences his annual preparations. Plans are drawn up, seed catalogues perused, and equipment is checked over. Much interest is added to gardening by proper planning and much practical value also. Like a great picture or a humble barn or garage, the finished result will largely depend upon the thought which precedes actual construction.

Width Vegetable Rows

Practically all vegetables should be grown in absolutely straight lines. Little things like lettuce, radish and carrots can go in rows from eight to twelve inches apart, while potatoes, peas and beans will need fifteen to eighteen inches and corn and tomatoes, sprawling cucumbers and melons from 18 to 24. To save space, rows of early and small stuff such as lettuce and spinach can be planted between corn and beets. Where this close planting is followed, it will be necessary to cultivate and fertilize frequently.

Flower Plans

In planning the flower garden, time of planting is important because some things must be started from seed indoors or in a hot bed. Certain flowers will stand a light frost and some will not. To have flowers from early summer until autumn, time of blooming must be taken into consideration, and heights should be noted down to prevent the tiny things from being hidden by such tall growers as Cosmos, African Marigolds and Stocks. Colors are important. Occasionally two shades do not go well together. Fragrance should be taken into consideration. Flowers like the sweet scented Evening Stock, while not particularly beautiful, have such a delightful odor, particularly in the early evening, that some of them should be included. Then again, flowers have individual preferences. Some like partial shade. Among these are tuberous rooted Begonias and annual Larkspurs, while the bright Nasturtiums, Portulaca and California Poppy revel in full sun and a dry location. With flowers, shrubs, roses, lawns and all forms of decorative gardening, informal planting is advised. Straight lines should be avoided and those already in existence, like house foundations and fences should be screened. Clumps of shrubbery and a few trees about a house will not only break these harsh lines, but will tend to tie the structure down to earth and produce a complete picture.

European scientists declare that rain falling in wooded land is 25 per cent. greater than that in open areas.

Use **ROYAL YEAST CAKES** *for a variety of breads like these...*

Nourishing Graham Bread is always popular. Recipe on page 8 of Royal Yeast Bake Book.

New Process of Pre-Seeding Gives Promise of Doubling Yields Of Crops In Western Canada

Visions of being able to double the yield of Western Canada cereal crops under existing weather conditions, by pre-seeding treatment of the grain were outlined by James Wort, collegiate teacher and biology student at the University of Saskatchewan, when he spoke to the members of the Gladiolus Society.

The pre-seeding treatment, known as "vernalization," was first developed in Russia. Applied to limited experiments at the Saskatchewan University, it resulted in almost double the yield of cereal and green matter as the control samples grown under identical conditions, Mr. Wort stated.

Vernalization, otherwise known as "springification," was first conducted by a Russian experimenter who claimed for it the possibility of growing winter wheat by sowing it in the spring. The originator of the process said that it would also advance the date of maturity in spring wheats by 35 days.

The same experiments in the United States showed that the process did little to advance maturity of the grain.

These two conflicting views came to the attention of Mr. Wort some time ago and he determined to make a series of experiments at the university in Saskatoon. The experiments were conducted under field conditions and in the greenhouses where artificial light was used to speed up maturing the samples. In both cases almost double yields were noted in the treated sample over those not treated and grown under the same conditions. Mr. Wort found no advance in maturity time in his experiments.

The "vernalizing" process, as outlined by Mr. Wort, consisted of saturating the seeds by water and then placing them in a dark room where the temperature was maintained at from one to three degrees centigrade for several days.

During the time the seeds were kept in the cool, dark room, germinating process went on inside the seed, though no sprouts appeared. When the seed was placed in the soil it began to grow more rapidly.

Mr. Wort offered no explanation as to why the yield was increased when the vernalization process was used.

A member of the audience said after hearing the address that a somewhat similar policy was used in ripening some flower seeds. He mentioned roses as an example.

Eskimos Know Secret

Dress Properly And Do Not Mind Arctic Winter

People in the Arctic suffer from cold no more and often less than Albertans because they have learned the secret of dressing suitably, Dr. J. A. Urquhart, federal government medico of Aklavik, told members of the Optimist club, Edmonton.

"When winter comes we know it's going to be cold and dress accordingly, but here people live in the hope a cold snap will end and are not so particular to wear proper winter clothing," he said.

Dr. Urquhart described the meticulous care the Eskimo women took to make warm clothing from caribou hides and sealskin. When a new parka was made the husband put it on and roughly jerked his shoulders. If the stitching did not hold perfectly he handed it back to his wife to make over because warm clothing meant life to him on a hunting trip, the doctor stated.

"When I want a new parka I pick an Eskimo my own weight and height and buy it right off his back. I don't take any chances in having one made for me," he related.

A bachelor is lucky in one way. When he gets a Christmas present he doesn't want, he doesn't have to pay for it.

Civilized man is the worst offender of all animals of the world in the matter of killing for sport.

W. N. U. 2087

Canadian Hay Supplies

Expect Keen Demand For Hay In Eastern Canada Before Spring

Owing to a short hay crop in Canada last year and to the lack of any substantial carry-over of hay from previous years, it was expected that the demand would be unusually strong until another crop was harvested.

The demand in September was really keen, in anticipation of general shortage, and stock yards and lumbering, mining and construction companies bought heavily with the result that prices advanced to comparatively high levels.

With this heavy buying many of the large corporations soon procured their season's requirement, sales dropped abruptly to only slightly more than normal and prices declined. Moreover, unexpectedly large quantities of hay have been released by the action of farmers in substituting straw, corn stalks and other roughage, as feed for their own stock in order to have more hay for sale, and added to this is the fact that in those sections of Nova Scotia and Ontario where it was earlier expected farmers would have to buy hay, the feeding season was shortened by the long open fall. Furthermore, the number of livestock was reduced, in areas of prospective feed shortage, by disposing of more of the inferior stock than is usual in times of plentiful supply.

In spite, however, of these various factors which have helped to conserve the supplies of hay it is the opinion of observers that by spring all of the marketable hay in eastern Canada will be required to supply the demand.

In the areas of shortage, both in Canada and the United States, hay supplies are being rapidly used up and it is expected that in these areas particularly there will soon be increased demand.

Idea Did Not Work

Farmer's Inspiration Spelled Disaster To Radiator Of Car

Farmer Dell Of Geneva, New York, had a great idea.

The more he thought of the idea, the better it seemed—to Farmer Dell. He confided in no one. He wanted to test it first.

The farmer's inspiration came from a peculiarity of Seneca Lake, one of the state's most famous beauty spots.

The lake very seldom freezes, despite the fact that surrounding waters are sheets of ice. Only in the most severe cold spells will the lake develop more than skim ice. There are various scientific explanations, including the great depth of the lake and its uniform year-round temperature. That didn't interest Farmer Dell. All he cared about was that the lake didn't freeze.

Farmer Dell's idea, as he later admitted, was to fill the radiator of his automobile with Lake Seneca water, and save the cost of purchasing non-freezing agents.

To his surprise, the water which would not freeze in Lake Seneca turned to ice so quickly during a zero cold wave that the radiator burst in several places.

To Have New Rifle

A new rifle for the annual shoot at Bisley will be provided for the next competitions, the Council of the National Rifle Association having decided to allow competitors for the King's Prize and other major competitions at Bisley in 1935 to use the pattern 0.14 rifle. This, when fitted with a telescopic sight, is the army sniping weapon, but telescopic sights will not be allowed in the "King's."

Bricks That Float

Spent shale, formerly regarded as waste material, is now being used in West Lothian for the making of bricks, which may be of any shape or color. The bricks can be so light that they float, so tractable that they can be cut with a saw more easily than timber, and yet strong enough for building purposes.

An Important Discovery

New Powder May Revolutionize Science Of Finger-Printing

Finger prints reproduced without a camera!

A new and powerful weapon is promised police for tracking down criminals by the invention of a new powder by Detective-Inspector Joseph Webber, of Taunton, Somerset, Eng. So successful have the initial series of tests been carried out, that it is being declared the powder may revolutionize fingerprint science.

The powder has been tested by government analysts, by Superintendent Battley, chief of Scotland Yard Fingrr-Print Department, and other authorities.

The authorities are hopeful that after final tests and improvements the powder will enable finger-prints to be taken from dark, or rough backgrounds. Little difficulty is encountered now with brilliant backgrounds.

The present system of taking finger-prints involves the smearing of a powder which brings up the subject and then it has to be photographed.

The new powder is smeared over the object where a trace of a finger-print can be detected, and then a print of the subject can be taken without a photographic process.

A New Malady

Driving an auto in a faulty posture is responsible for a new malady reported by the British Medical Journal. It's "auto backache," which may be mistaken for lumbago, rheumatism or sciatica. "Auto backache" is caused by driving in an inefficient seat over a long period.

Oxford University Professor Is Interested In Unifying Standard Of Speech For British Empire

One of the most amazing features of the British Empire is the variety of dialectic English speech the traveller may hear. England itself presents many different dialects. The Cockney, the Yorkshireman, the man of Devon—not overlooking the Oxonian—each has his own distinctive method of pronounciation, and he is quite indifferent as to how his neighbor handles the King's English.

In Scotland the traveller must be prepared for another style of speech, fairly familiar, however, around the world. Ireland has its North and South variations of "the brogue," and also boasts of its well-known Dublin accent. South Africa's English is diluted with a smattering of Dutch and Kaffir. The speech of the Australian man in the street is richly redolent of that heard in the neighborhood of Bow Bells; and even Canada must admit that she has a touch of the nasal twang familiar in the neighboring Republic, to say nothing of the delightfully original English heard in the Province of Quebec. To all this, and in all countries, must be added too-prevalent slovenliness of speech, and the day-by-day encroachments of slang.

Consequently he is a courageous man who, like C. Edgar Ford, Doctor of Music of Oxford University, essays to unify these dialects. Dr. Ford, at present in Canada, is, in his own words, "interested in setting one standard of speech for the Empire." He wants to break down those barriers which exist because of present dialects. Dr. Ford realizes the magnitude of such an undertaking, but approaches his task in a spirit of good humor. For example: "We in Britain, of course, have many different dialects, although they are tending to disappear. I once asked a girl (and this is a true story) as to why the Pied Piper was called Pied. She replied that it was because he was pied (paid) by the corporation to get rid of the rats."

The question of an international gold standard has no difficulties comparable to this standardizing of "English as she is spoke" in various parts of the Empire; but it is a job at which a man may work happily, and with certainty of many years of employment.—Toronto Globe.

A Quality Market

Commodities Demanded By Scotland Are Always High Grade

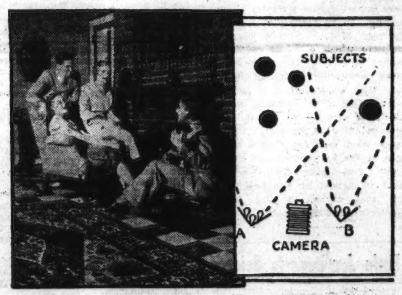
A lot of fun has been had with the alleged penuriousness of Scotsmen, says the Hanover, Ontario, Post, but we still think they are one of the greatest races on earth. A recent report by a Canadian trade commissioner contains the following comment: "Scotland uses more Canadian flour than England, in proportion to population, not only on account of quality but because of the different methods of Scottish bakers." And then comes this significant sentence: "Of all the markets in the British Isles, that of Scotland is pre-eminently a quality one and this trait runs through the whole range of commodities." It's a lesson Canadians could well afford to learn; to place quality above price. Cheapness never made any country prosperous. Indeed, to buy cheaply forces cheapness throughout our economic life. Quality should be the main consideration—not price.

Although based on observations and calculations of astronomers, our calendar of to-day was devised before invention of the telescope.

Man is the only "cry baby" known in the animal kingdom, says one anthropologist.

The SNAPSHOT GUILD

Don't Forget Snapshots at Night



A few inexpensive photoflood lamps are all you need for indoor pictures at night. Diagram (right) shows proper placing of lamps for picture (left). Diaphragm opening, f 6.3; shutter speed 1/25 of a second.

Although you may not be one of those lovers of the great outdoors and prefer the warmth of the old fireplace or furnace these cold, damp wintry evenings, there is no reason why you should not enjoy your camera, for it is always ready for action in or outdoors—an all-weather friend.

Time passes quickly and before we realize where the days and weeks have gone the air begins to get a little balmy and we are thinking of the garden, the yard or those pleasant drives in the car after dinner.

The next three months, however, are ideal for snapshots at night in the house and if you have not already experienced the pleasure of this fascinating pastime you have certainly missed a lot of fun and failed to "follow through" on your amateur photographic knowledge.

The "hey-hey-hi-de-ho" days of youth are the ones we always remember and as snapshots at night are so easy to take why not start in right now and make picture records of the many happy winter evenings at home. All you need are three or four photoflood lamps for brilliant illumination and a camera with an f 6.3 lens, or faster. Photoflood lamps cost only twenty-five cents each and as they are good for two hours of picture taking, the cost per picture is negligible. For the best results you should use the modern super sensitive panchromatic film. It is available in all standard sizes.

Let's suppose that Mary and you are entertaining Betty and Jack and everybody is as happy as the four-some above seem to be. Let's make a snapshot at night of your party.

The diagram indicates the relative placing of the subject, lights and camera for this particular group. For a different setting you can place the lamps accordingly.

After you have located the group in the finder and the camera is set, place an ordinary floor lamp, with the shade tilted upward, at position "A" as close to the subject as possible but out of the range of your finder. Lamp "A" should have sockets for three photoflood lamps. Two will do if you can have the lamp within three or four feet of your subject. (The light intensity increases as you place the lights closer to the subject and decreases when farther away.) Two photoflood lamps should be placed in lamp "B". Where shades on home lamps cannot be tipped for directing light on the subject, remove the shade. In such cases, some sort of reflector back of the lamps will throw more light forward. A white cardboard, a pillow case, or even a bright dishpan held directly behind the lights will help.

Set the diaphragm at f.6.3. If your camera is equipped with a self-timer, set the shutter speed at 1|25th of a second, turn on your photoflood lamps, take your position in the group and click—it has made a snapshot at night for you.

If you have a box camera you had better use a photoflash lamp (not to be confused with photoflood lamps). Here's what you do. Place the flash lamp slightly back of and a little to the right or left of the camera. Remove the shade and screw the photoflash lamp into one of the sockets—and be sure the current is "off." Assuming you have located the group, or subject, in the finder, open the shutter as you would for a time exposure and immediately turn on the photoflash lamp and after the flash of the lamp close the shutter at once.

Simple enough, isn't it?

The possibilities for indoor picture taking are endless and you are missing a lot of fun—and fascinating pictures—until you try it.

JOHN VAN GUILDER.

Motor Car Production

Sixty Per Cent. Increase In Sales In 1934 Over Previous Year

Automobile production in Canada during the calendar year 1934 recorded an increase of 78 per cent. over 1933 and 92 per cent. over 1932. The output in 1934 totalled 116,890 motor cars; in 1933 it was 65,852 cars, and in 1932, 60,789. An encouraging factor was the gain in the number of cars made for sale in Canada, which advanced from 43,178 in 1933 to 72,481 in 1934, an increase of 68 per cent. Cars made for export gained 96 per cent. to 44,409 from 22,674.

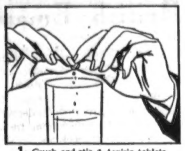
Passenger cars accounted for 92,157 of the year's production, while the balance was made up of commercial cars and trucks. Fifteen companies were engaged in the manufacture of motor vehicles in Canada during the year, thirteen of which are located in Ontario, one in Quebec, and one in British Columbia. Production reached its highest peak during the month of May when 20,161 vehicles were produced.

New motor vehicle sales in Canada during 1934 increased by 60 per cent. in number and 63.8 per cent. in value over the preceding year. Retail sales of 72,513 vehicles with a value of $74,471,260 were reported, and of this amount $58,064,337, or over 79 per cent., represented cash transactions. New automobile sales during the year were financed to the extent of $16,406,943. This reveals a very stable Canadian home market. Financing of all automobile sales, new and used, involved $30,091,463 and covered a total of 75,170 vehicles.

Voice on the bus: "I'll tell you the type he is. If he settled on an abandoned farm it would still be an abandoned farm."

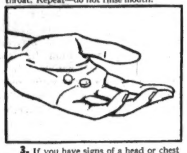
NOW SORE THROAT EASED IN LESS THAN 3 MINUTES!

Rawness, Irritation Go at Once Note Directions for New Instant Treatment



1. Crush and stir 3 Aspirin tablets in a third of a glass of water.

2. Gargle thoroughly—throw head way back, allowing a little to trickle down throat. Repeat—do not rinse mouth.



3. If you have signs of a head or chest cold take 2 Aspirin tablets—drink a full glass of water. Repeat in 2 hours.

Incredible as it may seem, doctors are now prescribing a way that relieves raw, painful sore throat in as little as 2 to 3 minutes!

All you do is crush and stir **3** *Aspirin* tablets in ½ glass of water and gargle with it twice.

Aspirin tablets disintegrate so *completely* no irritating particles are left. Results are immediate. At once soreness is eased—discomfort allayed.

Everywhere throat specialists urge this *fundamental treatment* instead of less effective old-time "washes" and "antiseptics." Remember this. And when you buy, see that you *get* ASPIRIN. It is made in Canada and all druggists have it. Look for the name Bayer on every *Aspirin* tablet. Aspirin is the trade mark of the Bayer Company, Limited.

DOES NOT HARM THE HEART

WORLD HAPPENINGS BRIEFLY TOLD

T. W. Grieve of Montreal was elected president of the Canadian Produce Association at its annual meeting in Toronto in conjunction with the 23rd annual convention.

Rear-Admiral Richard E. Byrd, who arrived at Dunedin, N.Z., with his second Antarctic expedition, disclosed the expedition is $50,000 in debt.

Toronto Centre presbytery of the United Church of Canada voted 51-20 in favor of ordination of women as ministers. The decision will be passed on to the general council of the United Church.

Canada's revenues for present fiscal year are running $31,000,000 and $32,000,000 ahead of last year. The Dominion's revenues are figured every day. They include customs, excise and income tax receipts, post office revenues, tax on gold and several minor sources.

Dr. H. A. Bruce, lieutenant-governor of Ontario, urged Toronto city council to start immediately on a slum clearance program. Dr. Bruce stated Canada was lagging behind the rest of the world in state-assisted housing and it was up to Toronto to give leadership to the rest of the Dominion.

Proves That Earth Wobbles

Stars Once Seen Now Do Not Rise Above Horizon

When the astronomers of ancient Greece grouped the stars and found names for them they listed constellations that can now longer be seen from Greece. In this way they supplied Sir James Jeans, the British astronomer, with a proof of a scientific fact discovered long years after they departed this terrestrial planet. Among the constellations named by the men of Greece 2,500 years ago are some which, although visible then, cannot be seen in Greece to-day because they never rise above the horizon. The wobble, as it is called, is a movement of the spinning earth in which its axis makes a small circle once in every 26,000 years; in other words, each pole describes a circular path in the heavens at the speed of about a foot a year. This slow movement is caused by the pull of the sun and moon on the bulging equatorial part our globe.

Little Journeys In Science

MATCHES

(By Gordon H. Guest, M.A.)

Perhaps the greatest discovery ever made by man was that of fire; and one of the most useful, if not the greatest, of inventions was that of producing fire by the use of matches. Friction matches containing the element phosphorus were first introduced by an Englishman, John Walker, about 1826. At the present time there are two general types of match in common use, namely the "strike-anywhere" and the "safety" match. The "strike-anywhere" variety is undoubtedly used the most and contains in the tip the following substances; potassium chlorate which is rich in oxygen; paraffin or sulphur; a binding material such as glue; a filling material such as ground glass, and a compound of phosphorus and sulphur known by chemists as phosphorus sesquisulphide. When the ordinary match is rubbed against a rough surface, enough heat is produced by friction to ignite the phosphorus. The heat produced by the burning of the phosphorus is increased by the burning of the potassium chlorate and carried to the wood by the slowly burning paraffin or sulphur. Other substances such as starch, clay, or plaster of Paris are often added to the match head to keep it dry or to regulate the speed of combustion.

In the "safety" match, red phosphorus, some substance which gives off oxygen readily, such as potassium chlorate, and some gritty material, such as powdered glass, are mixed with glue and placed on the side of the match box. The tip of this type of match contains potassium chlorate and an easily combustible substance, usually a compound of antimony and sulphur known to the scientist as antimony sulphide. The match cannot easily be ignited by friction except on the prepared surface on the box.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT
(Grapho-Analyst)

(All Rights Reserved)

(Editor's Note: Have you taken advantage of the author's offer to read your handwriting? It is an opportunity to know yourself better, and it may put you on the path to greater things. Read the offer following this article.)

It is not surprising that many of the letters I receive from readers of my articles ask whether there is any indication of talent. It is natural that people should be vitally interested in finding the best line of endeavour to follow, and any information that helps them to get the best out of their capitalization and make the utmost use of their latent possibilities is always welcome.

Handwriting does indicate talent, and this is not to be wondered at when we realize that handwriting is from the brain, and the brain is the source of individual power and capacity.

But the mere possession of a talent is by no means everything. We all know people who are talented in particular way, but who do not reach any heights of progress, who, in fact, are drifting along without ever doing anything really worth-while.

One case in particular comes to my mind of a man who has a rare talent for drawing. He can do things with a pen and pencil that I have rarely seen equalled by a person without any training along that line. Unfortunate ly, he happens to be blessed with more than enough of this world's goods, and is in a position where he does not have to work very hard for his money.

The result is that he has never gone to any trouble to bring out the best that is in him, and the world has lost a first-class artist.

This case will illustrate my meaning very aptly. I repeat that the mere possession of a talent does not imply that the talent will be used. There are certain essential characteristics that must be used in order that the talent can be brought into fruition.

The most important of these are Determination, Persistence and Willpower.

Many of my correspondents reveal talent potentialities, but they lack one or more of these other traits that are so vital to progress in anything that you take up.

There are a lot of people who have made real successes of themselves, without any hereditary or inborn talent, because they have had the will and determination to get somewhere. They have worked hard and made sacrifices in order that they might gain success.

And inversely, as I have shown, there are others with the really vital spark of inspiration lying within them who have failed because of an inability to drive themselves on.

Versatility is a good thing to have, but specialization more often leads to success. Make up your mind to follow a single line, and drive yourself forward with everything that you have along that single path.

Too many irons in the fire often means that none of them are properly attended to, and the result is failure.

Miss J. C., Regina.—You are so versatile that it ceases to be an advantage, and becomes a positive menace to you. You can do so many things fairly well that the trouble is to find one thing to specialize on. But you must do this, if you really want to get anywhere. Take up your singing, and put your whole heart and soul into it. Obtain proper training, and make up your mind that you are going to succeed as a singer. That is the only way.

* * *

A handwriting analysis may open the door of opportunity to you. Find out what your writing shows, as well as that of your friends. Send specimens of the writing you wish to be analysed, stating birthdate in each case. Enclose 10c coin for each specimen, and send with 3c stamped addressed envelope to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermot Ave., Winnipeg, Man. All letters are confidential, and replies will be forwarded as quickly as possible. Some delay is unavoidable owing to the large number of letters coming in.

Another Record Claimed

Man Keeps Motorcycle Engine Running For Eight Days

For 5,836 miles a motorcycle, with sidecar attached, travelled along ordinary roads in Australia without a moment's stoppage of the engine, and a world record is thus claimed by the man who rode the combination most of the time, Victor Barclay. He was relieved at intervals by two others but the engine was never allowed to stop at the change-overs. The ride took a little over eight days, the speed averaged being 30 m.p.h. The engine finally stopped owing to a defective plug.

SUNDAY SCHOOL LESSON

MARCH 3

PETER UNMASKS FALSEHOOD AND HYPOCRISY

Golden text: Wherefore, putting away falsehood, speak ye truth each one with his neighbor: for we are members one of another. Ephesians 4:25.

Lesson: Acts 5:1-42; 8:4-25.

Devotional Reading: Psalm 139:17-24.

Explanations And Comments

Peter Unmasks Falsehood and Hypocrisy, Acts 5:1-4. But (in contrast to Barnabas' true generosity; see the preceding verses), another member of the Christian community, Ananias, sold some property, kept back part of the money received, and, with the connivance of his wife (Moffatt's translation), brought the rest of it and laid it at the apostle's feet, placed it at their disposal, as if it were the whole. "So it happens that he rather honors the feet of the apostles than the eyes of Jesus," comments Calvin.

Peter saw through his hypocritical act and sternly asked, "Ananias, why hath Satan filled thy heart to lie to the Holy Spirit, and to keep back part of the price of the land?" He had not sinned against men but against God.

"While it remained, did it not remain thine own? And after it was sold, was it not in thy power? How is it that thou hast conceived this thing in thy heart?" Peter's words show that the selling was wholly voluntary, and that the sin of the couple was not in retaining part of the money received, for they had a perfect right to do this, but in pretending that the part which they offered was the whole, in seeking to gain unmerited reputation for liberality. "Thou has not lied unto men, but unto God." A lie may be acted as well as spoken.

The Fate of Ananias, Acts 5:5, 6. At these words Ananias fell dead, and his body was taken up and immediately buried. Here we may well recall the sensible words of Dr. Faunce that our mission is not to justify the ways of God to men, but to rectify the ways of men to God.

Nearly 3,000 miles of canal are in use in England.

New Sun Reflector

Very Simple Device Has Been Invented In Germany

A simple device, consisting of a thin sheet of highly polished metal cut somewhat in the shape of a kidney, is a German invention designed to bring sunshine into every home. The reflector is especially useful for directing the health-giving rays of the sun to the face. It also can be used in treating other parts of the body where solar heat brings beneficial results. The polished sheet of metal is corrugated in such a way that its many flute-like ridges act as multiple reflectors which intensify the heat of the sun's rays.

A plant in Norway produces rust-free and acid-resisting steel, having an annual capacity of between 40,000 and 50,000 metric tons.

FALSE TEETH

DR. WERNET'S POWDER

Grips plates so firmly and snugly they can't slip—you never know you have false teeth. Dr. Wernet's Powder is pleasant and never causes soreness—it is the world's largest seller—prescribed by leading dentists—costs but little but blissful comfort is yours all day long.

for BURNS & SCALDS

Sold by all Druggists—25c, 35c (tube), 50c and $1.00

MECCA OINTMENT

Doctors advise this *natural* corrective for Constipation!

Not a drug . . . safe, effective, economical!

Stop sour stomach, bad breath, headaches and all constipation ills. You can do it easily, cheaply with Quaker Bran.

Quaker Bran, the coating of the wheat, is milled so soft it cannot irritate. Yet it is effective. It works with nature to produce normal, healthy bowel movement . . . persuading the intestinal muscles to *normal* activity.

Remember, Quaker Bran is different from all *prepared* bran cereals. It is pure bran, uncooked—untreated—unadulterated. For these reasons it is definitely richer in mineral and vitamin content.

Serve it with your regular cereal each morning or in muffins, cookies, etc. There is a recipe book in every package.

QUAKER BRAN

Pure, *Natural*, packaged bran.

ENTERS PROTEST AGAINST SWIVEL CHAIR FARMERS

Ottawa.—A protest against "swivel-chair farmers" handing out advice to men who had spent years behind the plow was made in the House of Commons by John Vallance (Liberal, South Battleford), who for 29 years has been a wheat farmer in Saskatchewan.

Joseph Bradette (Liberal, North Temiskaming), a lawyer and merchant at Cochrane, Ont., started the protests by sponsoring a motion to promote a land settlement scheme, spending $20,000,000 over a period of five years to purchase farms for young men who have been drifting to the cities. He would give preference to boys born on the farms and leave out industrial workers and immigrants.

Although he was willing to support the Bradette motion, the Saskatchewan Liberal protested against lawyers, doctors and school teachers attempting to dictate to farmers on agricultural subjects. There was only one way to make the farm more attractive—through education and "you might as well throw your money in the lake" as to select several hundred boys indiscriminately, buy them farms, stock and machinery and expect them to make good.

Sir George Perley, acting prime minister, offered no objections to the Bradette motion going to the agricultural committee of the house for further study.

Under a land settlement scheme, said Mr. Vallance, candidates must be hand-picked. It would be useless to pay every applicant $1,000 over five years—as suggested by the Bradette motion—and expect him to make good. In the same way as immigration there must be discrimination and educational means to make the farm more attractive.

"I hope I never see and Canada never sees a contented peasantry in this country," exclaimed Mr. Vallance. Only in countries where there was no education for the masses was there contented peasantry. In a country like Canada there was bound to be rural migration as long as people did not realize the advantages of farm life.

Gasoline Inquiry

Tariff Board May Hold Session In Regina

Ottawa.—The tariff board may open its inquiry into gasoline tariffs in Regina. This would be an innovation for the board as at present constituted has never held hearings outside Ottawa.

The chief complaint that gasoline prices are too high, because of the tariff, came from the west, and the point under consideration is whether it would be cheaper to bring witnesses here or for the board to go to the prairies. The board is busily preparing its report for the budget, which will likely be down in three weeks. When it has completed this it will start almost immediately on gasoline probe, it is understood.

Relief Frauds

Hamilton, Ont.—The city treasury has received $1,451 as a result of exposure last week of two cases of relief fraud, Mayor H. E. Wilton announced. One family returned $1,000 and another $451. Both had substantial amounts left in their bank accounts after the city had been reimbursed it was reported.

Salvage Plan

New York.—Simon Lake, the submarine designer and salvage engineer, hopes to begin wresting next week the cargo from the British ship Hussar, sunk in the East river in 1780, and see whether $4,000,000 in gold is in it.

Trade Level Maintained

Geneva.—Volume of world trade maintained its level in 1934 compared with 1933, according to information supplied by the League of Nations secretariat. In 1932 it had fallen to 74 per cent. of the 1929 figure, but it increased slightly in 1933.

W. N. U. 2087

Cockroach Soup

Reprisals Follow Quickly When Misdemeanor Committed In Russia

Archangel, U.S.S.R.—Five persons, including M. Sosnin, former secretary of the Communist party committee at Isakogorzky harbor, were sentenced to prison for the part they played in the "cockroach banquet" of which they were alleged to have compelled several restaurant employees to partake.

The five men were accused of forcing the personnel of the eating place to eat soup containing the insects as a disciplinary measure after a customer complained of finding a cockroach in his food.

Immediately after the incident, Sosnin was removed from his political post. The court sentenced him to three years' imprisonment.

The others were sentenced to shorter terms.

Uniformity Of Wages

Premier Bracken Of Manitoba Would Do Away With Unfair Competition

Winnipeg.—Legislation directed at uniformity of wage and working hours throughout Quebec, Ontario and Manitoba is likely to be introduced in the Manitoba legislature by Premier John Bracken at the present session.

Unfair industrial competition aided by inconsistency of provincial labor laws is believed to be the object of the Bracken proposals. The new legislation would, it is learned, make it impossible for industries of one province to produce their goods more cheaply than possible in a neighboring province because of longer working hours and lower wage scales.

Provinces Have Not Submitted Relief Plans

Until Statements Are Received Ottawa Cannot Take Action

Ottawa.—Until provinces had submitted "concrete plans" for their relief operations after the current fiscal year, and stated their requirements from the Dominion government, he could make no definite statement to the house with respect to government policy, Hon. W. A. Gordon, minister of labor, told the House of Commons. The house was in committee of supply considering an item in labor department estimates.

No such information or plans had as yet been submitted by any of the provinces, Mr. Gordon said.

Wolves Becoming Menace

Great Damage In Prince Albert National Park Reported

Ottawa.—Damage caused by wild animals in Prince Albert National Park, Sask., was called to the attention of the government in the House of Commons by A. F. Totzke (Liberal, Humboldt). Hon. T. G. Murphy, minister of the interior, said he was waiting for a report from park officials and would make a statement to the house later.

Mr. Totzke said timber wolves were becoming so numerous they were forming into packs and doing great damage to trap lines and slaughtering wild animals in district adjacent to the park.

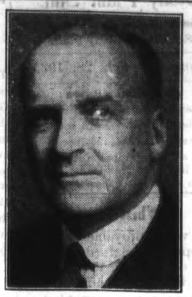
Mounties As Coast Guard

Ottawa.—Major-General J. H. MacBrien, commissioner of the Royal Canadian Mounted Police, told the Canadian Geographical Society it would "undoubtedly" be to the nation's advantage if the marine section of the force were developed into a regular coast guard service. He revealed the marine service of the force had given assistance to 76 vessels between April, 1932, and the present.

Study B.N.A. Act

Ottawa.—Three new members were added to the special committee of the House of Commons studying methods of amending the British North America Act. They are Hon. Peter Veniot (Lib., Gloucester), J. S. Stewart (Cons., Lethbridge), and Henri Bourassa (Ind., Labelle). Prime Minister R. B. Bennett moved for the appointments at the opening of the house.

TO CHANGE LAW



Hon. T. B. McQuesten, Minister of Highways for Ontario, who will introduce important amendments to the Highways Traffic Act in the Legislature. The amendments will be made with a view to reducing the accident toll on city streets and highways.

Likely To Retain Post

Judge Taylor May Remain Head Of Pension Commission

Ottawa.—Retention of Mr. Justice Fawcett Taylor at the head of the Canadian pension commission when his period of service as temporary chairman expires some months hence is said to be contemplated by the government.

He was appointed last July for a period of one year, and for the specific purpose of clearing up the so-called "marriage cases." Among his duties was that of making a complete report to the government on operation of pensions machinery.

The bill enabling the government to increase the number of commissioners by appointment of temporary members to the board has now passed the senate. The expectation is the government will name four to hold office until the present congestion is cleared away.

Fishing Schooner Race

Trans-Atlantic Contest Between Canada And American Boats Suggested

Lunenburg, N.S.—A trans-Atlantic fishing schooner race between the Canadian champion Bluenose of Lunenburg, N.S., and the Gertrude L. Thebaud, pride of the Gloucester, Mass., fleet, now appears to be a certainty.

E. Fenwick Zwicker, local business man, made public a series of cablegrams exchanged during the past few days with the Royal Ocean Racing Club of England, in which the latter said it was "ready to go."

General European Peace

Soviet Russia Wants Peace Pact Carried Out In Full

Moscow.—Soviet Russia notified Great Britain and France it is in agreement with the London proposals for a general European peace pact on condition they are carried out in full.

Foreign Commissar Maxim Litvinoff instructed the Soviet ambassadors at London and Paris to inform the governments there that regional pacts such as the proposed eastern Locarno agreement are considered by the U.S.S.R. as absolutely necessary for the preservation of peace in Europe.

This stipulation in the Russian attitude struck directly at Germany, which the Soviets have been accusing of having ambitions of military aggression against Russia.

Paid With Their Lives

Chinese Rebels Executed For Murder Of Missionaries

Shanghai.—Four more Communist rebels have paid with their lives for the murder of the United States missionaries, Mr. and Mrs. J. C. Stam, in southern Anhwei province last December, the foreign office here revealed.

Anhwei province authorities, it was announced, captured the quartette and executed them. On Dec. 20, two weeks after the tragedy, four others were reported put to death, and the alleged leader of the Communist hordes that destroyed the Stam's mission and beheaded the couple was later reported killed in battle.

Depletion Of Waterfowl

Fear Expressed Of Danger Of Extermination Of Ducks

Winnipeg.—Federal authorities are concerned over depletion of waterfowl and fear extermination of some species of ducks, according to a report submitted to the Manitoba legislature by Hon. J. S. McDiarmid, minister of natural resources.

Solution of the duck depletion problem rests primarily on measures taken in the United States, where the birds are fired upon over a much greater area in their migratory flight between the international border and the marshes of the Gulf of Mexico and Atlantic coasts, the report said.

Obliged To Cancel Visit

Hamilton, Bermuda.—Sir Astley Cubitt, governor of Bermuda, received confirmation from the Duke of Gloucester he would have to cancel his visit to Bermuda owing to delay caused in the schedule of H.M.A.S. Australia when she rushed to the aid of the schooner Seth Parker off Taiti.

FRANCE BIDS FOR ATLANTIC AIR SUPREMACY

An intensive race is on between various nations to determine which will be the first to establish commercial air service across the Atlantic. France has taken the lead with her huge new air liner, christened the Lieut. de Vaisseau Paris. The ship recently completed its maiden flight in a manner which has given the French high hopes of being the first nation to span the Atlantic with regular commercial air service. At the same time Great Britain and the United States are experimenting with super-planes of different types and both countries expect to have planes ready in the near future. The new French air liner is capable of carrying 70 passengers in addition to its crew of seven. It is propelled by six motors of 850 horsepower each and is 104 feet long. It has a cruising speed of 145 miles an hour and is designed to make the transatlantic flight in less than 20 hours. Above is a picture of the giant French plane, while inset is Baron Henri de la Grange, French aviation commissioner, who is now in the United States studying commercial aviation on this side of the water.

A NATION WIDE BUILDING PLAN IS SUGGESTED

Toronto.—Erection of a Dominion government mortgage loan corporation to provide credit for a huge, nation-wide construction program was advocated by Hon. H. H. Stevens, former federal minister of trade and commerce, in an address before the Ontario Retail Lumber Dealers' Association.

The body would have power to sell its bonds in Canada and if necessary have power to guarantee them.

"This government-controlled body would do for the people of the country what those at present in private control are failing to do, that is, provide decent housing for the people," Mr. Stevens said.

When he spoke in Toronto almost a year ago and pointed out the chaos into which business had drifted he had a definite plan, Mr. Stevens told his audience, and subsequent studies have confirmed the possibility of such a plan.

It is three-fold. He suggested appointment of a federal commission of industry and commerce, placing farmers and other primary producers in a position which would give them a larger measure of control in marketing of their products and a national construction program.

Reason a start is not made on the construction project is because the credit of the country is in the control of a very small number of men and is not actually available except at costs that are too high or on conditions that are too onerous, Mr. Stevens said.

He recalled his speech in the same place a little more than a year ago when he declared there were "cankers" eating at the economic life of the Dominion. That gave rise to the price spreads investigation and, he said, the whole country has been shocked at the things brought to its attention.

"I started this movement. I am determined to see it through," he declared amid applause.

Not Taking Part

Corporation In Scotland Cannot Afford To Mark Jubilee

Greenock, Scotland.—Not without a struggle, the corporation of Greenock on the Clyde resolved by a vote of 12-10 not to take part in the celebrations of the silver jubilee of the king's accession.

The resolution explained expenditures would not be fitting "because of the unemployment in the town."

Bailie Mrs. McLeod described the king as "a wee, nice man" who reminded her of her father.

Bailie Scott vigorously objected to "trailing the unemployed into the question." The action would make Greenock the last town where anyone would think of establishing a new industry, he asserted.

Plenty Of War Supplies

Italy Well Prepared For Trouble In Ethiopia

Rome. — Italy's supreme defence council promised the nation the wells of war supplies will not run dry as 4,000 Italian troops steamed across the Mediterranean to Africa in consequence of Italo-Ethiopian tension.

The council, over which Benito Mussolini himself presides, concluded its fifth session in recent days with the statement:

"Italy can rest assured the council has done its duty in preparing in time those indispensable measures so that an eventual warlike effort can be carried out in conditions which will assure victory."

Plea For Lower Tariff

Ottawa. — Colin Campbell (Lib., Frontenac-Addington) made a plea in the House of Commons for lower tariffs on mining machinery. He said in his resolution that the mining industry in recent years has been subjected to increasing taxation and he'd only been able to keep going because of the ingenuity of engineers whose researches had produced less costly methods of operation.

Income Tax Returns

GOVERNMENT OF ALBERTA

IMPORTANT NOTICE

Income Tax Returns should be filed with the Superintendent of Income Tax, Qu'Appelle Building, Edmonton,

BEFORE MARCH 31st, 1935

Forms may be had from any Provincial Government Office, or from any bank, or direct from the Superintendent of Income Tax, Edmonton.

All persons residing, employed, or carrying on business in Alberta, are liable to a tax on income, subject to the exemptions provided for in the Act.

Full information re exemptions and method of filing returns is contained on the forms themselves.

Further information will be furnished on application to

INCOME TAX BRANCH
Qu'Appelle Building, Edmonton

Mentz on Social Credit.

What's wrong with Social Credit, as proposed by Mr Aberhart, was the basis of a lecture given by Mr Mentz to a CCF meeting in Hall on the 22d. There was a good attendance, and a keen interest was taken in the speaker's address. Mr Mentz's object was to place before the people the stand taken by the CCF regarding Aberhardt's Social Credit. He dwelt briefly with the injustice of the economic system of today, and of Mr Bennett's inability to fulfill election campaign promises. Of social credit he illustrated the impossibility of the plan as devised by Mr Aberhart to operate under the present system.

Mr Wilson of Edmonton was also a speaker. He dealt with Co-op. dairying in regards to live stock.

After Mr Mentz's address quite a number of questions were asked, and some lively discussion took place on some phases of the CCF platform.

Sale Starts 12 Noon.

M. Zucht, Auctioneer.

REURNED MEN ARE WELL LOOKED AFTER

Hon J Russell Love, Provincial Treasurer, told the Legislature last week that the present Alberta Government has done all it possibly could to assist the returned men of the province. "There are twice as many men in the Government service of Alberta as there were when we came into office in 1921," Mr Love declared. He said that approximately 50 p.c. of all male employes in Government service are Great War veterans.

Obituary.

The funeral took place Thursday last of the late Mrs Rose Schmigelski, relict of the late John Schmigelski, aged 62 years. Deceased was one of the oldtime residents of the Carvel district. A service was held in the church at Carvel by Rev Father Dydka.

She leaves to mourn her loss 5 daughters and 6 sons — Wasyl, Michael, Joseph, Nicholas, Harry, Fred.

Co-op. Officials Meet.

Approximately 25 secretaries and managers of the UFA Co-op. organisations from the Edmonton district within a radius of 60 miles met in the City Tuesday, under the chairmanship of Norman F Priestley, Vice Pres. of the UFA, to discuss problems of co operative purchasing of farm supplies.

Representatives from the Stony Plain Co-op. Society, Messrs A P Anderson, W T Propp, Carl Schlecker and Murray Barnes, were present. The report from the local Society shows that it had a very successful year in 1934.

Truck For Sale.

Ton and a-half Chevrolet Truck, 1929 model; in first-class shape. Jac Brox, Spruce Grove. 14 2

"PIG BITES THE MAN" IS NEAR BEING "NEWS"

Every reporter, says The Market Examiner, has been told that "when the man bites the dog, that's news," and when the pig bites the man it comes pretty near being news also. A correspondent of the Red Deer Advocate says that Leo Schmidke met with a painful accident while loading a pig at a neighbor's farm. In an effort to get the stubborn animal into the box it turned on him and bit him on the knee, almost taking his kneecap off.

CHAPTER XII.—Continued

"It's peyotl," he said sharply. "I know the damned stuff. Peyotl is the old Aztec name. All I know of it is that it is one hell of a kind of dope. After a little while it crazes the user . . . . distorts his ideas of right and wrong, you know. If you found those half-smoked stubs by the camp fire, it's pretty clear that whoever was there was usin' peyotl cigarettes. It's against the law, of course."

"Do you happen to know whether old man Kane uses the stuff?"

"I'm damned sure he does not," said Jameson. "He gets bung-full on red-eye when he comes to town and he gets the Indians to make tizwin for him sometimes, but I'm sure he doesn't dope."

"Think Dustin uses it?"

"Not for a minute. Hardly any one uses it now. The Indians used to use it because they like to get all hopped up and it was too risky sellin' whisky to Indians. A federal offense, you know. It crazes 'em. I only know one fool about here who ever uses the stuff and that's Gregg out at the Broken Spur. They call him 'Peyotl' Gregg because of the way he gets full on it. He's a half-wit who's been workin' on the Broken Spur ever since Dustin and Goddard got it."

"Humph! If you're right. . . . then this man Gregg must have been at that camp in the hills. If Kane was there then this man Gregg maybe can tell us were we can find him. 'Fell me this, Jameson . . . What's the minin' law? Can a man, who locates an ore-vein, follow that vein when it leads into and under another man's land?"

"I'm pretty sure he can," said Jameson after a moment's thought. "That is . . . he can follow a vein that he finds off a man's land. He can't go on a man's land, pick up a vein and follow that. It's got to be done fairly. . . . Find a vein on his own land; trace it under some one else and follow it there unless the land owner beats him to it. See? Why?"

"Well, it sizes up this way to me. . . . Dustin and Kane have found ore on the Hour-glass. Carr doesn't know about it. Dustin has bought up a note that Carr gave Pegram and Dustin will use that note to try to make Edith marry him to save her father. That note gives Dustin half ownership in the Hour-glass and will make Gerald Keene, who owns the other half of the Hour-glass, a partner of Sam Dustin and, if Dustin's plans work out, he will marry Edith Carr.

"Just what do you want?" demanded Jameson curtly.

"First of all I want to find old man Kane. He's the key to the puzzle. He's got to tell us just what kind of a deal he's made with Dustin. He can tell us where and how he found that ore. And if it's on the Hour-glass, whether Dustin knew it was on the Hour-glass when it was located. He may be able to tell us if this man Dustin uses peyotl. If he does, he's probably not responsible for his actions."

"You're barkin' at a knot," said Jameson forcibly. "Sam Dustin is always responsible for his actions. Look here, Stone! What stake have you got in this. You're playin' too close to your lap for me. Come clean, old man."

"You know how the Hour-glass is owned, don't you?" asked Stone suddenly.

Jameson did not know and said so.

"Joe Carr owns one half of it. Gerald Keene, the nephew of old Peter Vinton, owns the other half. If one of them dies the survivor gets all."

Jameson stood staring at him for a moment. Then he went to a closet and came back with bottle and glasses.

"You're tryin' to talk like a sane man," he said, "but your words just don't target. You don't know this man Dustin. By Carr's note, Sam Dustin practically owns Carr's half of the Hour-glass ranch. Keene owns the other half. A gold-mine has been found on the Hour-glass. Will Sam Dustin give half of the Hour-glass with its gold mine to a man he never saw? What deal will he make with this Gerald Keene? I'll tell you. In some way or other, in some damned dark, deep way that we couldn't think of, Gerald Keene will lose his share of the Hour-glass and Sam Dustin will own it."

"Talk your age," said Stone laughingly. "This man Dustin, that you all credit with superhuman powers, can't work miracles, I reckon. The main thing for me to do is . . . find this man Kane. He's the key to the whole darned mess."

"You're probably right"—Jameson nodded curtly—"but consider this. . . . In the camp near where that gold-ore was found you found those pieces of peyotl cigarettes. I don't believe anybody about here but that man Gregg ever smokes them. If our guess is right, then Peyotl Gregg was with the man who found or located that ore vein. . . . Probably old man Kane. The fact that Sam Dustin had that package in his coat pocket implicates him, of course. You can always get him under the narcotic law. He can explain it, of course. . . . But we don't need that now. Your best bet to find out exactly what has taken place is . . . question Peyotl Gregg or . . . find Dad Kane . . . And for God's sake tell his man Gerald Keene to watch his step when he gets here."

"What do you mean?" demanded the mystified Stone.

"You half-baked idiot! . . ." Jameson flung himself across the desk. "This man Gerald Keene represents one-half of the Hour-glass. Sam Dustin virtually owns the other half in the note that he holds from Joe Carr. Gold has been found on the Hour-glass and Dustin knows about it. Do you want to see Sam Dustin marry Edith Carr?"

There was no doubt in Duro Stone's answer to that question.

"All right! Then kamy out your first plan. . . . Find Dad Kane! I'll start a still-hunt for him. In the meantime we might try a hand at Peyotl Gregg if we can find him."

With those words in his ears, Duro Stone took his departure.

CHAPTER XIII.

Spike Goddard watched Dustin ride up to the ranch-house of the Broken Spur and turn his horse over to one of the hands. With one glance at his partner Spike emitted a long, low whistle, went to the office, got out decanter and glasses and sat down to wait. Presently Dustin stormed up the steps, banged into the house and into the office, where he stood staring at his partner. Spike's very silence condemned him; also it acted on Dustin like salt on an open cut.

"What the hell ails you?" demanded Dustin curtly. "Anything happen to you?"

Spike shook his head. "Nothin' ever happens to me," he said. "I stay home and 'tend to my knittin' and nothin' ever happens to me. If I ever went traipsin' over the valley trailin' some red-headed girl who likes me just as much as a prairie-dog likes a ground-rattler, I might expect somethin' to happen to me but it never does. . . ."

The bottle whizzed past his head and broke in a score of fragments on the wall. He retrieved his glass that had escaped ruin and laughed.

"You go on an' answer your own question. What all happened to you?"

Dustin told him sketchily and Spike listened in evident disbelief. When that disbelief grew too great for words, Dustin turned on him in growing wrath.

"Listen here," he said. "I'm goin' to come clean with you, Spike. Then you'll understand what I'm after."

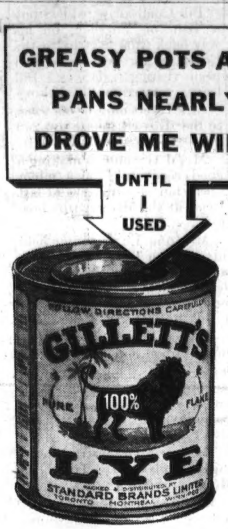
"I know," said Spike guardedly. "You're after that red-headed girl of Joe Carr's."

"Yes and by God, I'll get her, too. I went over to the Hour-glass to put it up to her, but she was out ridin' with that damned drug-store cowboy, wanderin' over the country. Six months from now she'll be my wife and she'll have her own kitchen to tend to. She'll be stayin' home then. . . ."

"Looks like that ambition ought to keep any red-headed woman content," said Mr. Goddard, grinning. "It looks to me like you've got the means to persuade her. Why didn't you tell old man Carr that you've bought up his note to Pegram for eleven thousand dollars and that if Edith don't marry you, they're both headin' for the Poor Farm? You'd have him short if you spring that on him."

(To Be Continued)

GREASY POTS AND PANS NEARLY DROVE ME WILD UNTIL I USED



It lifts grease right off without scrubbing

Just use a solution of 1 teaspoonful of Gillett's Pure Flake Lye in a quart of *cold** water. Instantly the grease dissolves—without scouring! Use Gillett's Lye whenever you want an effective household cleanser. Frees clogged drains, cleans toilet bowls. Kills germs, and destroys odors. Order a tin from your grocer!

*Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET—Send for the *free* Gillett's Lye Booklet. It tells how this powerful cleanser and disinfectant shortens dozens of cleaning tasks. Also gives full directions for soapmaking, thorough cleansing and other uses on the farm. Address: Standard Brands Limited, Fraser Ave., & Liberty St., Toronto, Ontario.

GILLETT'S LYE *EATS DIRT*

Little Helps For This Week

"The beloved of the Lord shall dwell in safety by Him, and the Lord shall cover him all the day long." Deut. 33:12.

What'er events betide,
Thy will they all perform;
Safe in Thy breast my head I hide,
Nor fear the coming storm.

I have seemed to see a need of everything God gives me, and want nothing that He denies me. There is no affliction but either in it, or after it, I find that I could not be without it. Whether it be taken from me, or not given me, sooner or later God quiets me in Himself without it. I cast all my concerns on the Lord, and live securely on the care and wisdom of my heavenly Father. If my ways are in a sense hedged up with thorns and grow darker and darker daily, yet I distrust not my God in the least, and live more quietly by faith than I would do if I possessed every thing.

Meat packers report that more meat was consumed in the United States in 1934 than ever before in history.

Glasgow, Scotland, and the Isle of Man are to be connected by an air service.

HEADACHE, BACKACHE?

Mrs. J. W. Flanagan, 6 Labatt Ave., Toronto, Ont., says: "I had headaches, pains in my back, had no appetite and would feel dizzy and faint. I was so weak I could hardly keep up. I took Dr. Pierce's Favorite Prescription and it seemed to give me new life."

New size, tablets 50 cts., liquid $1.00. Write Dr. Pierce's Clinic, Buffalo, N. Y., for free medical advice.

A New Occupation

Proprietor Of Belgrade Store Does Sums For Students

"Sums done for three halfpence a time," is the notice that has been put up in the window of a shop situated opposite a school in Zagreb, near Belgrade, Serbia. The proprietor does a roaring trade. Every evening students deliver their mathematical homework, and every morning on their way to school they call for it—correct in every detail.

The Full Vitamin Value of Cod Liver Oil

Albert Larue 74
J W Welbonrne 42

Division 6:
A Jesperson 139
H Schellenberger 59

Division 7:
W Borden 240
C R Tufford 172

Div. 1—R C Johnson was elected by acclamation on the nomination day.

NEWSY NOTES FROM SPRUCE GROVE DIST.

Spruce Grove High School pupils paid a visit to the Alberta Legislative Chamber, where they were welcomed by Donald MacLeod, member for Stony Plain Constituency, who conducted them around the lobbies before the Assemblymen met and saw them comfortably seated in the members' gallery.

A very enjoyable evening was provided by the girls of the Grove basketball team and their able coach Mr Stitt. The entertainment consisted of a whist drive, at which some 16 tables participated, followed by a dance with music provided by our local string band from the Calahoo reserve.

Prizes for the whist fell to Esther Schultz and Douglas McLeod. The whole evening was voted a success.

INGA M.D. RATEPAYERS RE-ELECT COUNCILLORS

Division One—
W. T. Propp 105
M McKinlay 143
Division Four—
Jas. Collingride 48
A. E. Hopkins 62
Division Six—
Henry Kulak 67
John Staub 164
Onoway Hosp. Rep.
Schooley by accl'm'tn

Saturday's voting for Inga Councillors resulted in the return of the 3 representatives who were seeking re election—those in Divs. 1, 4, 6. In Div. 1 M McKinly defeated W T Propp decisively, altho this was the second time Mr Propp had contested the Councillorship in this division.

In Div. 4, where Hopkins was opposed by Collingridge (a new man in Municipal contests) the result was much closer, Hopkins winning with a majority of 14.

In Div. 6, Hy Kulak opposed the councillor seeking re election, J Staub, and the latter won with a majority of 97.

Brightbank News.

The Weatherman has been very kind to us for some time, and Spring seems near. A Hansen's Corner resident reports having seen a robin and a crow recently.

Mr J Kyle, Miss Susan Kyle and Mr R Fryer were Sunday visitors at the H H Summerfield home.

The UFA masquerade dance at Lucknow Schoolhouse was a big success. Prizes were won by Mr V Mohr, Mrs F Hasse, Miss B Edwards, Mrs H Schneider Jr. The judges were the Misses E Lutz and Weberling and Mrs M Mickleson for the ladies. For the men—Mr A Baron, Mr J Altheim, Mr M Michelson.

Gordon McDonald was a Sunday visitor at the home of Mr and Mrs Jetkant.

A large crowd from this district took in the Literary entertainment at Hansen's Corners on the night of Feb. 16, and report having been highly delighted.

A steady stream of voters have been going to Carl Clausen's P.O. during the past week, casting their vote for the Chicken Pool.

A novelty dance is being put on by Bright Bank Girls Basket Ball Club Friday March 15th. Four prizes will be given—2 for ladies, 2 for gents.

Bevington Speaks at Edson.

Geo Bevington CCF candidate for the Jasper-Edson Federal Riding, held a public meeting in the Memorial Hall, Edson, on Tuesday last, under the auspices of Canadian Labor Party. Ald. Jas. East gave an address.

Holborn Happenings.

Come to Holborn UFWA dance at Holborn hall, Friday March 1. Special music; extra good eats, and prizes. Adm., 50 cents.

There was a good attendance on Friday Evg. last at Holborn Hall, when a lecture sponsored by Holborn UFA, was given on the subject of the CCF by Mr Walter Mentz, a Labor leader from Edmonton. The speaker dwelt on the many benefits which would accrue to every farmer in the province when this fine Utopian scheme is adopted. There is talk, here, of having another lecture given, on the same subject; when an effort will be made to bring out Mr Norman Priestly, who is the chairman of the CCF Alberta Council.

Sparksie Says.

A young man seldom realises how dear his best girl is until he goes broke trying to make her wishes come true.

If somebody would only pull the sled up the hill for us, life would be one long delightful slide.
